

Biology 2211

Biome Research assignment

Using digital or print resources, complete a research based assignment and examine a particular biome of personal interest in regards to the following factors:

- climate
- physical geography
- location and special adaptations of dominant plant life
- location and special adaptations of dominant animal life
- one species and its range of tolerance
- other abiotic and biotic factors that are important to the biome
- any issues or controversies surrounding the biome and how humans interact with it
- any history of the biome you find interesting, such as how it is an important part of the cultural or economic development of the surrounding area

This report should be 2-3 pages (typed) and include a list of resources used. You may include 1 small picture that is no larger than $\frac{1}{4}$ page. Some examples of the areas you may wish to explore are:

- Codroy valley grand Estuary
- Exploits river
- Grand Banks
- Labrador tundra
- Gander lake
- Newfoundland Highland forests
- St. Paul's Salt marsh

Due Date: _____.
